

4-POINT BENDING TESTER

For glass in building

APPLICATION

4-point bending tester

- for flat thermally toughened glass and heat strengthened glass for use in building
- to determine the bending strength, including the effects of the edges,
- according to EN 1288-3 :2000 - Determination of the bending strength of glass

CONSTRUCTION

The 4-point bending tester meets the requirements of the European Standard EN 1288-3 :2000. It consists of

- Tensile testing machine with load measuring device and with stepless, specific rate of stressing on the specimen.
- Supporting and bending equipment with free rotating rollers

DIMENSIONS

width	560 mm
height	1860 mm
length	1850 mm
